LI-NING

No Compromise! Goose feathers

We have assembled a selection of high quality shuttlecocks.

LI-NING shuttlecocks are exclusively made from goose feathers. In our selection process, we have focused on choosing shuttlecocks with the best durability and recyclability, without compromising flight performance.

SUPER 1000 (G-800)

Speeds: 77 or 78. Used by the best clubs in Europe.

Top scorer in recyclability with excellent flight performance.

SUPER 750 (G-500)

Speeds: 77 or 78. Used by the best clubs in Europe.

Top scorer in flight performance and usability.

G200

Speed: 77. Used by clubs in Europe "exercise" level.

Top scorer in flight performance and value for money.

QUALITY & DESIGN

LI-NING's clothing is known for its high quality and stylish design. The club collection is designed to accommodate space for sponsor logos without making the clothing boring. The garments are made from LI-NING's patented high-quality material, AT-Dry. This material is characterized by its fantastic ability to absorb and transport sweat.

The club collection is unisex in all sizes, making all processes simple and efficient.

The clothing is available in sizes from 3XS to 5XL, ensuring a fit for everyone, including children, women, and fully grown men. The fit of the clothing ensures optimal functionality.

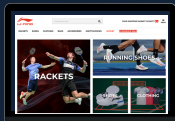

GARMENT PRINTING

LI-NING has a department for handling garment printing. We manage all tasks. This includes club as individual tasks, such as sponsor and name printing.

ONLINE UNIVERS

LI-NING offer an online web solution in terms of managing club orders. This allows clubs and club members to easily & quickly to place their desired order. This is, of course, supported by email and phone service if needed.

We have more than 10 years of experience with online club orders, both for collective club orders and orders from individual club members.
